Projects

Wokeye - The project management app

Created a Project Management application where one can create, delegate and monitor the tasks.

- One task I performed was creating the user interface (UI) for the application.
- I developed the React components and incorporated Redux for handling the application's state management.
- One of my responsibilities was designing and constructing the Mongoose schemas routes to establish backend APIs.

Spotter - HealthCare Website

Build a Healthcare application where one can

- View the current health status.
- I constructed the React components.
- I was responsible for designing and developing Mongoose schemas and routes to create backend APIs.

EMart - E-commerce Website

A e-commerce application where one can

- Purchase clothing items.
- Assembled HTML5, CSS3, and JavaScript elements.
- It is possible to observe current global trends.
